SCHEDULE YOUR VASECTOMY REVERSAL

We strongly prefer a formal consultation to be conducted with the presence the partner prior to scheduling the reversal. A detailed questionnaire and a focused physical examination allow us to better appreciate each patient's condition, anatomy and particular requirements during the reversal procedure. Typically, the couple's many questions are best answered during the consultation and if needed, with a follow up phone call afterwards.

Following the consultation, procedure scheduling and other proceedings may be conducted via telephone, fax or e-mail.

For those from afar, we will be happy to conduct a phone interview and schedule the procedure with a pre-op visit the day prior to the procedure. We ask that one download the patient registration, male patient & male infertility questionnaire and fax the completed forms to us prior to the phone interview.

Procedure may be scheduled Monday through Friday with 7:30 AM as our preferred starting time. Please keep in mind that we will try our best to schedule your procedure on the dates you have selected, however, elective surgery scheduling is also predicated upon the availability of operating room, its staff and the surgeon. By planning ahead and keeping to the schedule, one can avoid the hassle of cancellation and re-scheduling entirely. If your schedule is less than flexible, we suggest that you plan ahead by at least 4-6 weeks so we may secure the desired operating room time slot for you

As with all non-covered elective surgeries, vasectomy reversal is a pre-paid procedure. Please refer to the section on financial policy for payment information and cancellation policy.
